● Personal Information:

- Asukwo Ndong Anso
- Block 2 Flat 5 Philkruz Estate Jabi, Abuja
- 09027578470
- asukwoanso2018@gmail.coom

● Professional Summary:

- A highly motivated and skilled Full-Stack Web Developer with 2 years of experience in designing, developing, and implementing dynamic web applications. Proficient in front-end and back-end development, with expertise in HTML, CSS, JavaScript, React, Node.js, and various database management systems. Adept at collaborating with cross-functional teams to deliver robust and scalable web solutions. Passionate about leveraging technical skills to solve complex problems, enhance user experiences, and drive continuous improvement. Seeking to contribute technical expertise and innovative thinking to a forward-thinking organization committed to growth and excellence.

● Education:

- Degree(s) obtained: BSc Computer Science
- Institution(s): National Open Universal of Nigeria
- Graduation year(s): currently in school

● Skills:

- **Web Development** (e.g., HTML, CSS, JavaScript, React, Angular, etc.)
- **Adaptability** (e.g., flexibility, handling change)
- **Work Ethic** (e.g., reliability, dedication, initiative)

● Certifications and Training:

- Web Development Certifications: Front-End Development
- Institution: Techware Academy
- Date obtained:22nd of June 2024

● Projects:

- Project Title: Invoice Management System
- The Invoice Management System (IMS) is a robust software solution designed to automate and streamline the invoicing process for businesses. It allows for the efficient creation, management, and tracking of invoices, facilitating smoother financial operations and improving overall business productivity. This system is particularly beneficial for businesses that handle a high volume of transactions and require precise financial management.

Role:

● Manages system settings, user roles, and permissions.

● Oversees the overall operation and maintenance of the IMS.

● Ensures data security and compliance with company policies.

Technologies Used:
● Front-**End:**

- HTML, CSS, JavaScript for building responsive and user-friendly interfaces.
- React.js or Angular for creating dynamic and interactive user experiences.

● **Back-End:**

- Node.js, Express.js, or Django for server-side development and API creation.
- Integration with payment gateways like PayPal, Stripe, and others for payment processing.

● **Database:**

- MySQL, PostgreSQL, or MongoDB for managing customer and invoice data.
- Ensuring data integrity and efficient querying capabilities.

• **Efficiency:** Significant reduction in manual invoicing efforts and administrative workload, resulting in faster invoice processing times.
• **Accuracy:** Improved accuracy in billing and payment tracking, minimizing errors and discrepancies.
• **Financial Insights:** Enhanced financial visibility through comprehensive reporting and analytics, aiding in strategic decision-making.
• **Customer Satisfaction:** Improved customer experience with timely and accurate invoicing, and flexible payment options.
• **Scalability:** The system's ability to handle increasing transaction volumes supports business growth and scalability.

- • **Compliance:** Ensured compliance with financial regulations, reducing the risk of legal issues and penalties.

• Languages:

- Fluent in English

•Interests and Hobbies:

- Football and Cooking.
